

Follett Solutions for Alternate Care Facilities – Ice Pro™ ice bagging and dispensing system

Ice Pro with Horizon Elite™ ice machine

Bacterial-retentive filter system

Chewblet® ice is the perfect size and texture for patient care

- Soft, chewable texture
- Promotes hydration
- Softer ice helps quench patient thirst when unable to consume liquids or solid food
- Molds well in ice bag for best skin contact and swelling control
- Perfect for medical storage and transport applications

Ice Pro ice bagging and dispensing system

- Dispenses at the touch of a button
- No bending into bins or scooping ice
- Eliminates human contact with ice
- Convenient ice on-site

Follett bacterial-retentive filter system

- Supports ASHRAE 188 water management plans
- Validated barrier to waterborne bacteria from incoming water
- Retains microorganisms without volume restriction
- Non-carbon filtration, no use of glues and resins, reduces nutrient load
- Produces cost-effective, high purity effluent for ice and drinking water

The perfect ice distribution system for Alternate Care Facilities
