

Follett Solutions for Blood Bank Refrigeration

Double door upright refrigerators

Single door upright refrigerators and freezers

Undercounter refrigerators and freezers

Follett blood bank refrigerators and plasma freezers maintain precise and consistent temperatures for your valuable blood products.

- Meet all requirements for AABB, ARC and FDA

Powerful refrigeration system and superior air distribution

- Forced-air cooling with industry-exclusive plenum air distribution delivers cold air to all six levels providing ± 1 C temperature performance throughout
- Top-mounted, modular refrigeration system introduces no heat into the storage cabinet
- < 3 C temperature rise during defrost in upright plasma freezer

Fully-featured, user-friendly interface

- 7" full-color LCD touchscreen displays temperature and provides easy navigation to feature programming
- High/low temperature, door open, power failure and low battery alarms provide security for your blood and plasma products
- 6" chart recorder standard

Stainless steel construction and high-quality components

Trust Follett's blood bank refrigerators and plasma freezers to protect your valuable blood products
