Testing for COVID-19 is one of the strongest weapons to understand and limit its spread, and maintaining patient samples either frozen or at 2-8°C is critical to obtaining accurate test results. Follett [medical-grade refrigerators](#) are engineered to maintain the precise temperature control you need with forced-air refrigeration to deliver consistent cabinet-wide temperatures and quick recovery even with multiple door openings.

- Heavy-duty stainless steel construction
- High and low localized alarming for security
- Integral temperature logging
- Easy-to-read temperature display in F or C

Trust Follett's wide range of refrigerators to protect your patient samples
