

# Infinite Control When Every Degree Counts

## Introducing the New Infinity Series™ Refrigerators

**Patented "infinite" variable speed control technology** delivers only the precise amount of refrigeration needed at any given time for optimal temperature performance.

The use of a natural hydrocarbon, low GWP refrigerant supports environmental sustainability initiatives.

Reduced noise and energy consumption without compromising pharmaceuticals, vaccines and other valuable products requiring safe cold storage.

Tested and certified to NSF/ANSI 456 for safe storage of vaccines.

New flexible storage system allows you to customize the configuration to meet your changing needs. Choose from shelves, baskets, drawers or any combination of these interchangeable options.

Available in three sizes – 12, 20 or 25 cu ft
