

Edge Series™ undercounter refrigerators

Follett Edge Series undercounter refrigerators with variable speed compressor are perfect for vaccine, pharmaceutical and medical product storage.

- Ideal for medium to heavy duty applications
- 5 cubic feet of storage capacity
- Front-breathing design allows easy installation under standard-height counters
- Extremely quiet, 43 dBA

High performance

Designed to maintain temperature uniformity of ± 3 C whether the unit is loaded or empty.

Controller and alarms

Door-mounted easy-to-view LED digital display features preset automatic alarm tracking around the set point, consistent with vaccine and high-value product storage requirements.

Protection for valuable products

Engineered to meet the strict CDC vaccine guidelines in a small footprint. Side wire barrier prevents misplacement of product and eliminates exposure to adverse temperature/freezing.

Access port and security

1.2" (3.05 cm) access port permits the passage of external temperature monitoring probes.

Energy efficient and sustainable

Natural R600a refrigerant meets Significant New Alternatives Policy (SNAP) and the AIM Act of 2020 for the low global warming potential and no ozone-depleting substances.

Cycle defrost

Sophisticated defrost cycle triggers only when needed and when the compressor is not running, minimizing temperature spikes and providing optimum temperature control.
