

# Bin correctional package

Upright ice storage bins and  
Ice•Devlce™ ice storage and dispensing systems

The correctional package accessory provides safety, security, and tamper-resistance to Follett's® upright ice storage bins with SmartGATE® ice shield and Ice•Devlce ice storage and dispensing systems. Correctional package includes lockable hasps, tamper resistant screws, and the elimination of the inspection window.

Designed for prisons and other facilities where security is a must

- inspection window found in standard Follett bins is eliminated, restricting access to ice
- lockable hasps are attached to both ends of access door assembly further restricting access to ice
- tamper resistant screws used to attach access door to body of bin to make it difficult to remove access door without a specialized tool
- lock not included

Available for many Follett bin models

- correctional package accessory is available for all SmartGATE upright bins (except SG1000S-36 and SG2000S-60) and Ice•Devlce ice storage and dispensing systems
- specify item# 00917054 in addition to the desired ice storage bin or dispensing system
- correctional package accessory does not change the overall dimension of the respective bins
- for specific bin specifications, refer to specification sheets for SmartGATE upright bins (form# 9140 and 9145) or Ice•Devlce ice storage and dispensing systems (form# 9720 and 2320)

Ice dispensing models

- thumbscrews are utilized on Ice•Devlce chute to enable removal for cleaning
- hole openings on ice dispensing chute are compatible with tamper-resistant screws
- when cart is not in use, store in a secure area
