

Carbon and carbonless Water filter systems

SAME FILTER LINEUP • ENHANCED FILTER CAPACITY

REPLACEMENT FILTERS COMPATIBLE WITH EXISTING FOLLETT FILTER SYSTEMS

Complete water filtration systems

- New system design for ice and water dispensers and ice machines
- Reduce scale formation and optimize ice machine performance
- Remove dirt and abrasive insoluble particles that can damage the ice machine

Three systems to choose

- Carbonless – Capacity based on water conditions
- Standard capacity carbon – 5,000 gallons
- High-capacity carbon – 17,500 gallons

Deliver clean ice and water with all filters

- Agion® antimicrobial technology protects filter media and inhibits the growth of microbes, extending filter life and improving water quality
- Trap particles 0.5 micron and larger in size
- Certified by NSF to remove protozoan cyst (Cryptosporidium and Giardia)
- Certified ANSI/NSF standards 42, 53 and 401

Carbon filters

- Remove chlorine, off-tastes and odors
- Proprietary compression molded carbon block production process ensures optimal pore structure for efficient contaminant removal
- Manufactured with premium acid washed coconut shell base activated carbon

Pressurized water sanitizing kit

- Sanitize the internal pressurized water lines of the ice and water dispenser
- Facilitate a complete sanitization of the entire ice and water dispenser when performed in conjunction with the standard ice machine and dispenser cleaning/sanitizing process
